

STUDENT DISCLAIMER

Some procedures and techniques that are taught in Wilderness Medical Associates' programs are based on substantially different clinical guidelines from those used in conventional urban EMS and first aid.

I understand that the procedures and techniques that Wilderness Medical Associates' teaches in their courses are to be used only in the specialized wilderness context of delayed or prolonged transport.

I agree to use these modified procedures and techniques **ONLY** under the following conditions:

- I am working in a **wilderness or delayed/prolonged** transport context.
- I have been **trained** in these modified procedures and techniques and have maintained my certification as suggested by Wilderness Medical Associates.
- Unless he/she is incapable of understanding or responding, I will inform the victim about the procedure and its potential risks and then obtain verbal consent before initiating treatment.

When I am using the field protocols as an employee/representative of a company, organization or agency, I will do so only as part of an approved Policy and Procedure for medical treatment.
